

BIG MAPLE LITTLE ALLEY

URBAN ALLEYWAY REDESIGN

Auburn, WA

Preliminary Design Concepts

AFFILIATION: University of Washington, Liveable City Year

CLIENT: City of Auburn

CONTRIBUTION: Design development, renderings, site details, final report

CONTRIBUTORS: Jack Alderman, Alison Ong

MEDIA: AutoCad, SketchUp, Illustrator, Photoshop, Hand Sketching

This group project was a product of a self-driven independent studio, in which we created our own syllabus, recruited professional mentors, scheduled client meetings, and developed a project timeline. We were supported by Livable City Year (an Urban@UW program) and worked closely with the City of Auburn Department of Parks and Recreation. Through several client meetings we defined the project goals, and worked with the clients to refine three concepts into one final design. The studio concluded with several public presentations and a publication of our project report through Livable City Year. Currently Auburn Parks and Recreation is applying for funding to construct our proposed alleyway activation.

- 1 Wider entrance to Arts & Culture Center
- 2 Existing lawn
- 3 Existing big leaf maple
- 4 Pervious paving over tree roots
- 5 Curvilinear plants
- 6 Bioretention planters
- 7 Sunny green space
- 8 Raised deck for seating or performance
- 9 Trees in planter boxes
- 10 New trash location
- 11 Food truck location

Intermission in the alley

Outdoor performance in the alley
